

# Power immersive player experiences at any scale.

Momento gives players the responsive real-time functionality and lag-free experience that make them love your game—all while boosting developer productivity.

## Gameplay First

Just build an amazing game instead of getting distracted by infrastructure. Momento takes care of operational maintenance and infrastructure details so you don't have to.

## Fuel Viral Growth

Momento handles millions of requests per second out of the box with zero tuning. Playerbase growth should cause celebration, not headaches!

## Drive Competition

Stoke the competitive flame with purpose-built leaderboard APIs and real-time notifications that keep your rankings fresh, even with millions of users.

## Increase Player Engagement

Improve player retention and immersion with real-time chat and seamless state messaging between clients, powered by Momento Topics.

## Momento Topics

Keep your game running smoothly and your players in sync with fast communication powered by our serverless event bus.

## Momento Cache

Automatically adapt to absorb traffic spikes of 1M+ requests per second, manage hot keys, maintain optimal cache hit rates, and reduce latencies.

## Momento Leaderboards

Handle tens of millions of items and rapid ingestion, querying, and updates with our serverless leaderboard service.

## Momento Vector Index

Run vector similarity searches in real time without algorithm complexities or infrastructure setup. Effortlessly power in-game recommender systems and other use cases.

## Energize real-time interactions

### Leaderboards

Track and rapidly update player rankings automatically.

### Real-Time Events

Keep players in sync with an event bus that connects across your entire stack.

### Rate Limiting

Build player throttling for hackers and spammers.

### Session Stores

Save user settings for a single gaming session that expire automatically.

### Inventory Caching

Manage item drops and grabs like a pro. Cache inventories for instant and scalable access.

### In-Game Chat

Push messages in real time, automate moderation, and record them in chat history.

DEMO ▶

With just a few lines of code, you can build chat with **automatic moderation and translation** that **scales to millions of users**. Check out the demo at [gomomento.co/chat](https://gomomento.co/chat).

## Make cross-platform effortless

Meet player demand for cross-platform flexibility with integrations and SDKs that access the same resources from any screen or device—no compromise on player experience required.

iOS

Flutter

node.js

GO

### Customer Spotlight

## ZigZaGame improves scalability and stability for their in-game chat

- Momento Cache **enabled them to scale** to handle the volume of connections from Lambda functions—previously impossible.
- Integrated Momento in **just three weeks**, making their architecture fully serverless.
- By replacing ElastiCache Redis, Momento Cache reduced the total cost of ownership for their in-game chat service by **more than 30%**.
