GAMING

Power immersive player experiences at any scale.

Momento gives players the responsive real-time functionality and lag-free experience that make them love your game—all while boosting developer productivity.

Gameplay First

Just build an amazing game instead of getting distracted by infrastructure. Momento takes care of operational maintenance and infrastructure details so you don't have to.

Fuel Viral Growth

Momento handles millions of requests per second out of the box with zero tuning. Playerbase growth should cause celebration, not headaches!

Drive Competition

Stoke the competitive flame with purpose-built leaderboard APIs and real-time notifications that keep your rankings fresh, even with millions of users.

Increase Player Engagement

Improve player retention and immersion with real-time chat and seamless state messaging between clients, powered by Momento Topics.
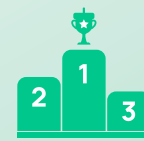

THE MOMENTO PLATFORM

Topics

Keep your game running smoothly and your players in sync with fast communication powered by our serverless pub/sub service.

Cache

Automatically adapt to absorb traffic spikes of 1M+ requests per second, manage hot keys, maintain optimal cache hit rates, and reduce latencies.

Leaderboards

Handle tens of millions of items and rapid ingestion, querying, and updates with our serverless leaderboard service.

Energize real-time interactions

Leaderboards
Track and rapidly update player rankings automatically.

Real-Time Events
Keep players in sync with an event bus that connects across your entire stack.

Rate Limiting
Build player throttling for hackers and spammers.

Session Stores
Save user settings for a single gaming session that expire automatically.

Inventory Caching
Manage item drops and grabs like a pro. Cache inventories for instant and scalable access.

In-Game Chat
Push messages in real time, automate moderation, and record them in chat history.

DEMO ▸ With just a few lines of code, you can build chat with **automatic moderation and translation** that **scales to millions of users**. Check out the demo at **gomomento.co/chat**.

Make cross-platform effortless

Meet player demand for cross-platform flexibility with integrations and SDKs that access the same resources from any screen or device—no compromise on player experience required.

iOS Flutter Web

node.js GO .NET python elixir AND MORE

Customer Spotlight

ZigZaGame improves scalability and stability for their in-game chat

- Momento Cache **enabled them to scale** to handle the volume of connections from Lambda functions—previously impossible.
- Integrated Momento in **just three weeks**, making their architecture fully serverless.
- By replacing ElastiCache Redis, Momento Cache reduced the total cost of ownership for their in-game chat service by **more than 30%**.
