

# We're here to help your **games succeed!**

Momento gives players the responsive real-time functionality and lag-free experience that make them love your game—all while expediting delivery and keeping costs under control. With a relentless focus on speed, scalability, and reliability, **Momento empowers gaming companies to deliver high-quality, low-latency experiences.**

## Delivering the **Ultimate Gaming Experience** requires:

### In-Game Chats

Push messages in real-time and store them in chat history

### Rate-Limiting

Built-in player throttling for hackers and spammers

### Leaderboards

Track and update player rankings automatically

### Real-Time Notifications

Keep players up-to-date on important state changes

## Only Momento offers an **immersive gaming experience** with:

### Infinite Concurrency

Our gateway ensures increases in your playerbase do not cause scaling headaches and scales to millions of requests per second

### Highly Consistent Latencies

Low tail latencies significantly outperform other solutions ensuring gamers receive a lag-free experience

### No Partitioning Required

Proactively manage load distribution, automatically mitigating hot partitions and prevent downstream overloading

### Intelligent Control Plane

Horizontally scale in both gateway and storage layers allowing for variable loads without compromising performance

### Robust Security

We offer built-in end-to-end encryption, per-request authentication, and deep observability

Momento optimizes your infra to deliver a **delightful gaming experience!**

**Scale to Millions of DAUs**

**Rock Solid Connections**

**Lag-free Experience**
